

Want to get the most from your enterprise mobility strategy?

Legacy applications and systems that don't leverage the latest mobile technology stifle productivity and growth. In fact, a Forrester survey of 200 global organizations indicates that 78% would greatly benefit from an application modernization effort.

Neudesic's unique IP and integration expertise will help you bring your legacy applications and systems into the mobile age without having to deploy costly hardware.

A Neudesic mobility proof-of-concept (POC) solution will:

- Unlock the value of your enterprise assets while keeping everything secure behind the firewall
- Deliver rich messaging endpoints to native, web and other business applications
- Make your existing applications and systems mobile ready without having to modify them in most cases
- Deliver cross platform mobile apps that maximize reuse

SCHEDULE YOUR ENGAGEMENT TODAY:

3 WEEKS OR 120 HOURS • Call today for special pricing.

Neudesic can help you get integrated. To learn more about our products and services, call (800) 805-1805, or visit our website at www.neudesic.com.

Our Proven 4-Step Proof-of-Concept Process

01 NEEDS ANALYSIS

We interview key personnel to understand your current environment and systems, and learn about your future goals. We then identify a business scenario involving one or two candidate systems, and one chosen mobile application.

02 DESIGN

We use our collaborative design process and work with your team to understand your broader goals and objectives, using these insights to finalize the solution architecture, taking into account security, access control, management, etc.

03 DEVELOPMENT

We develop a POC that showcases how the cross-system enterprise mobility back-end solution would be implemented across the chosen systems. We also develop a mobile application for your selected mobile device that enables the chosen business scenario.

04 DOCUMENTATION

Your engagement isn't complete until we provide you with:

- Vision, scope and requirement documents
- System design specifications
- A working POC for your chosen business scenario
- An outline of engagement specifics and recommendations
