Neudesic Pulse Weaves the Social Fabric of Enterprise Collaboration.

With Neudesic Pulse, it's easy to share ideas and information, uncover valuable knowledge, identify subject experts, establish customer communities, integrate business systems, assign and manage complex tasks, mobilize your enterprise, and more.

Collaborate using Dynamics CRM and SharePoint

Transform Dynamics CRM, SharePoint into a modern social collaboration environment capable of inspiring unmatched productivity. Neudesic Pulse integrates with most business systems, so you can interact with others in comfort from the applications you use every day.

Get Information on Demand

Keep the information you need where you can find it by following the People, Groups, Tags and Systems that are important to you.

Choose Your Deployment

You get the same productivity-enhancing features whether you host Neudesic Pulse on your own servers or with us. And you're always in control of your content.
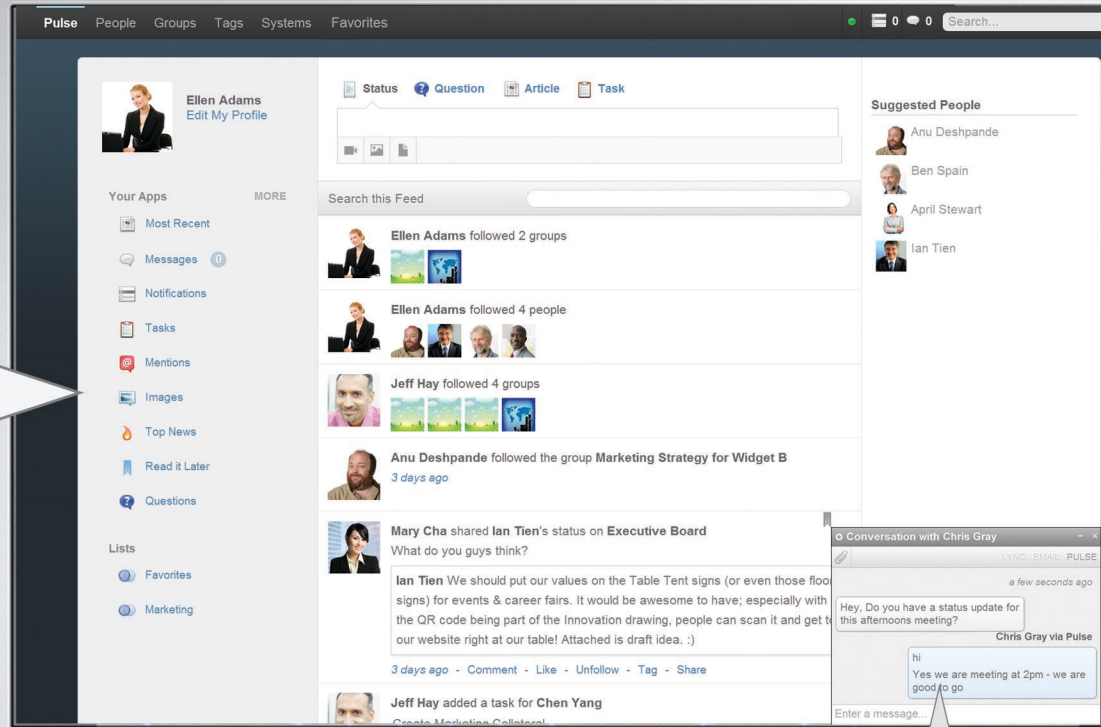

Connect from Anywhere

With mobile applications for iPhone, Android, Blackberry and Windows Phone 7, Neudesic Pulse goes where you want to be. So whether you're in the office, at home, or on the road, Pulse keeps you connected to people, information and systems in real-time.

Keep Your Information Secure

Improved Active Directory authentication support and enhanced control over System feeds make Pulse 3.0 more secure than ever. Neudesic Pulse's Unified Activity Stream delivers a concise, easy to read business news feed that keeps you connected across Dynamics CRM, SharePoint and other line-of-business applications.
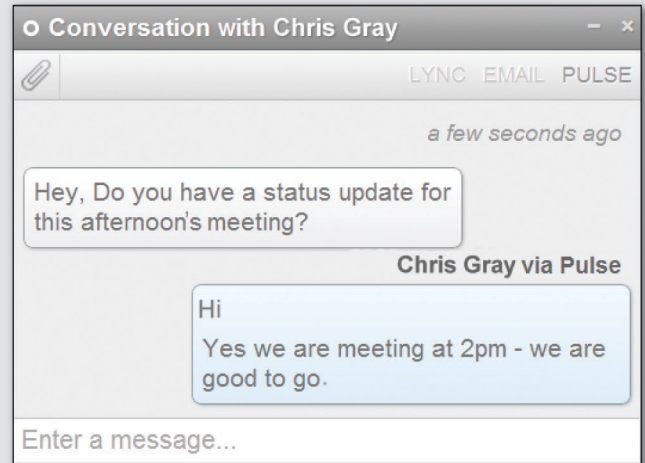

New Features

Pulse 3.0 features a new user interface design with enhanced navigation and productivity features like "Favorites" that provide easier and faster access to the information you care about most.

Spotlight 3.0 Feature

Direct Messaging

Share files and conduct one-to-one and group conversations from within Neudesic Pulse 3.0, or communicate with others via text or voice through direct integration with Microsoft Lync. You also receive email notifications from Pulse to keep you in the conversation when you're not logged in.

a few seconds ago

Hey, Do you have a status update for this afternoon's meeting?

Chris Gray via Pulse

Hi
Yes we are meeting at 2pm - we are good to go.

Unified Activity Stream

Unified Activity Streams and social embed features keep you connected across Dynamics CRM, SharePoint, and other line-of-business applications, bringing all your valuable business information together in one place.

Faster Video Streams and Downloads

Added support for content delivery networks makes video streaming and downloads faster than ever. Share training videos, webinars, or other content across the enterprise, and view or download them directly through your News Feed in the office or on the road with Pulse Mobile App.
